produced, which is also the parts we made mostly, we can always deliver parts with a high standard and meet the needs of the industry. Through our advanced multi-axis CNC machines, Yitong Machinery can always provide customers with high-precision and competitive services on the premise of reducing your auto parts manufacturing costs and ensuring product quality

Need to complete about 10,000 precision parts every day? Delivery is not a problem. Our existing CNC Machining Auto Parts are now being produced 15,000 each day, with two shifts per day, and this is just one of our projects. Before proceeding the mass production, do 20 or 100 samples confirm the size, is this possible? Of course, we have equipment dedicated to small batch production.

Yitong Machinery has more than 40 machine machines, multi-axis machining centers to meet the special high-precision machining demands and production requirements of precision parts from our customers, in addition to the CNC Machining Auto Parts we worked on mostly. We know that your customers can't wait, that's why our philosophy is built on fast turnaround time without any complaints
