

## **Metal Stamping Pressing**

Yitong® Metal Stamping Pressing is a producing method, through the pressure application for the metal plate, which shall be placed between the top part and bottom part, which forms the stamping mold.

## **Product Description**

You are welcomed to come to our factory to buy the latest selling, low price, and high-quality Yitong® Metal Stamping Pressing. We look forward to cooperating with you. "To achieve zero faults via continuous improvement, to satisfy our customers' needs and expectations, to make pledges we fully understand and think we can keep, and to keep all commitments to customers on schedule," is our guiding concept.

### **Metal Stamping pressing parts**

With advanced technologies and facilities, strict quality control, reasonable price, superior service and close co-operation with customers, we are devoted to providing the best value for our customers for Reasonable price for China Yitong® Metal Stamping Pressing, Special emphasis within the packaging of solutions to avoid any damage during transportation, Detailed attention towards the useful feedback and suggestions of our esteemed clients.

Reasonable price for China Spare Parts, Metal Stamping Pressing, By continuous innovation, we will present you with more valuable items and services, and also make a contribution for the development of the automobile industry at home and abroad. Both domestic and foreign merchants are strongly welcomed to join us to grow together. Yitong® Metal Stamping Pressing is one metal processing method.

Stamping is a producing method, through the pressure application for the metal plate, which shall be placed between the top part and bottom part, which forms the stamping mold. As long as the stamping mold is created, large quantities of components can be created with the same die, so stamping is usually considered as a production suitable for mass order.

Yitong® Metal Stamping Pressing is the use of punching and die to deform or break stainless steel, iron, aluminum, copper and other materials to achieve a certain shape and size.

Yitong® Metal Stamping Pressing is sometimes referred to as sheet forming, but with a slight difference. The term "sheet forming" refers to the use of a sheet material, a thin-walled tube, a thin profile, or the like as a raw material.

**Welcome to  
Ningbo Zhenhai  
Yitong Machinery  
Factory**

**About  
US**

Thank you for your interest in Yitong Machinery, which is a IATF 16949 certified manufacturer in machining and milling. Yitong machinery was founded in 2007 in Ningbo, China, starting from fastener production, later began making high precision fuel injection connector for Automotive industry, mainly for BMW manufacturer and other famous auto companies. Now we have full experience in producing various precise CNC machining, CNC milling components, especially in Automotive, wind power, electrical industries, etc, as well as capabilities in stamping, forging production for clients.
