Yitong Machinery provides custom machining for a large range of commercial and industrial industries, from round flat to square washers. All of our Stainless Steel Washer come in a range of styles, materials, and sizes to best suit your individual needs. Surface finish can be zinc blue plating or finishing with hot dipped galvanized finish in order to enhance durability and resistance, when material is mild steel, carbon steel, except the stainless steel. We can create a burr-free finished piece with the use of multiple processes and setups.

Washer are usually round metal rings used to distribute the load of threaded fasteners. The Stainless Steel Washer is also used to ensure that the fastener is pressed against a smooth surface to prevent loosening under vibration. The Stainless Steel washer produced by Yitong Machinery is matched with another bolt produced for the wind power industry. This customer is a leader in the global wind power industry.

The material of this Yitong® Stainless Steel Washer is stainless steel 316. First of all, we will cold forming the raw materials according to the drawing and 3D file, then continue to proceed CNC machining the semi-finished materials. This will not only produce the size and accuracy required by customers, but also can save time and materials substantially, thus reducing the cost for our customers. No matter what drawings and designs our customers send us, we will provide the most cost-competitive production process.
